Michelle/Stephen –
The waste shipment referenced in Ramboll's email of July 1, 2019 (below) was postponed and is now scheduled for September 2019. Please confirm if Evoqua Water Technologies facility in Darlington PA is still acceptable to receive the waste.

Yours sincerely

Subject: off-site compliance request - VIRA spent carbon to Evoqua in PA

To: Michelle Granger, USEPA Region 2

Ramboll/RioTinto is proposing to have spent carbon sent to the Evoqua Water Technologies facility in Darlington, Pennsylvania for re-activation. The waste facility is in USEPA Region 3. (Region 3 ROC is Stephen Forostiak).

This waste consists of carbon used for vapor treatment during operation of the soil vapor extraction (SVE) system and the sub-slab depressurization system (SSDS) located at 191 Route 31, in Washington New Jersey (Region 2) as part of the ongoing VI Removal Action (VIRA).

The attached form provides the generator information and information regarding the proposed re-activation facility. Also attached are the laboratory analysis results for the spent carbon.

Does Off-site Rule apply to re-activation of spent carbon?

If yes, I understand that the current procedure calls for the EPA project manager to request authorization from the Off-site Rule office. Please make the request and let us know if ok to proceed with the waste carbon removal to Evoqua in Darlington PA.
